

PRESS RELEASE

NOVEMBER 17TH, 2024

In today's digital world, cybersecurity knowledge and skills are essential for both large corporations and small and medium-sized enterprises (SMEs). Understanding this need, the CyberAgent project partners from across Europe have joined forces to create training materials for SMEs, higher education institutions (HEIs), and vocational education and training (VET) students - future employees of companies.

The CyberAgent platform is taking shape!

In parallel with the development of training materials, the CyberAgent team has created an interactive platform prototype. This prototype allows you to test the platform's functions and capabilities, which include not only learning but also sharing experiences, networking, and collaborating.

Project partners and experts actively participated in the development of the prototype, sharing their insights and providing feedback. Together, we aimed to create a platform that best meets the needs of the target groups. **[Platform link](#)**.

The platform will offer:

- **Learning** using interactive training modules on current cybersecurity topics, which are related not only to technical and analytical, but also to organizational and risk assessment knowledge and skills.
- **Sharing experiences** and exchanging best practices.
- **Networking** with other platform users and seeking collaboration opportunities.

The development of the prototype was based on research results and feedback, which aimed to identify the needs of target audiences and cybersecurity gaps, as well as to take into account the aspects of training material development. This is to ensure that the platform is

effective and useful for all its users.

More about CyberAgent project: www.cyberagents.eu

The screenshot shows the CyberAgent website homepage. At the top, there is a navigation bar with links for Home, Collaboration, Learning content, and Contact. The CyberAgent logo is centered, and an Account button is on the right. The main section features a large video player with a play button and the text 'Welcome to CyberAgent'. Below this, a 'Learning resources' section is titled 'How it works' and 'Available content'. The 'Available content' section displays three cards: 'Security program management' (Technical Skills), 'Systems administration' (Technical Skills), and 'Security governance & policy' (Organizational Skills). The footer includes the European Union logo, the text 'Co-funded by the European Union', the CyberAgent logo, and a disclaimer: 'Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.'

Project coordinator: Kaunas Faculty of Vilnius University.

Project Leader Dr Renata Danielienė, Institute of Social Sciences and Applied Informatics.
